Contains Humic, Fulvic, and Ulmic Acids

Not a fertilizer, not a soil amendment. Used for chemical fixation of minerals and fertilizers, keeping them in an exchangeable form available for plant uptake and use.

PRODUCT DESCRIPTION

HA+ can be applied to all crops and soil types. It structures the soil, contributing to a larger root structure and better water storage, resulting in improved water uptake allowing the plant to produce better in dry years. It makes available nutrients and elements that are already in your soil. Improves plant-microbe interactions in the soil to make nutrients more available to the plant. Reduces soil compaction by breaking up hard pan.

ESPECIALLY BENEFICIAL FOR DRYLAND FARMS
