

Liquid Plant & Soil Supplement

Clean Green[®]

HA+

with

888 Biological

PRODUCT DESCRIPTION:

HA+ can be applied to all crops and all soil types. It structures the soil, contributing to a [larger root structure](#) and better water storage, resulting in improved water uptake allowing the plant to produce more in dry years. It makes available nutrients and elements that are already in your soil. Improves plant-microbe interactions in the soil to make nutrients [more available to the plant](#).

Reduces soil compaction by breaking up hard pan.

HA+ contains liquid humic acid extracted from Leonardite. Humic acid is a naturally occurring organic substance found in soils, coal and peat, resulting from the decomposition of organic matter, particularly dead plants. It contains 70+ Trace Minerals that are essential to plant growth and development. These Trace minerals strengthen plant brix and make it more insect resistant. HA+ has a high cation exchange capacity which serves to chelate (collect) plant food elements and release them as the plant requires. The chelation process holds the nutrients in the soil solution and prevents their leaching and runoff.

ESPECIALLY BENEFICIAL FOR DRYLAND FARMS

BENEFITS:

- [Enhances Seed Germination](#)
- Stimulates Soil Microbes
- Includes Soil Enzymes and Bacteria
- [Increases Yields](#)
- Environmentally Safe and Non-toxic
- Naturally Controls Nematodes
- [Helps Farmers get the Most Out of their Fertility Plan by Making Nutrients Available](#)
- Makes More Nutrients Available for Plants
- Reduces Soil Compaction
